

Powerway Institute

Quality Planner – Course Description

Course Mission:

Powerway Quality Planner is a 3-day course. The first two days of training are designed to provide a comprehensive review of the developmental tools and concepts needed to create and manage APQP documents. The last day focuses on putting the information to use by troubleshooting common problem scenarios. There are several information links in Quality Planner, many of which involve the creation of child documents from information found in their respective parent documents. If you do not create parent documents correctly, child documents will not exist. The third day of class offers the safest environment in which to learn from these mistakes.

Prerequisites:

You should have knowledge of the APQP Process and the documentation necessary for PPAP submittals, as well as the following skills and/or knowledge: Keyboard skills and basic Microsoft Windows® experience.

Audience:

Designed for quality planning core team members who are responsible for creating and managing APQP and PPAP documentation.

Format:

Classroom training

Topics Covered:

- Learn how to track the five APQP steps.
- Learn to create and edit APQP project documents, as well as gather & verify them for PPAP submittal.
- Learn how to configure and customize your APQP system.
- Learn how Quality Planner controls and distributes documents.
- Learn how to create electronic binders for APQP project documents.
- Work in small groups to resolve and complete 16 problem scenarios. These are the most common problems that users create for themselves.
- Learn how to export and import projects.
